In BELDEN BRICK you have the most complete and unusual color selection of face brick in this country

In Ohio where our eight plants are located, Nature deposited the country's finest shales and clays, and through the process of manufacture in our modern plants, the lights and shadows of all Nature's delicate tints have been reborn in "BELDEN BRICK." The use of BELDEN BRICK enables the most meticulous architect and builder to secure a practical and beautiful color and texture for any style of architecture. The following pages are reproductions of typical BELDEN Face Brick panels and Floor Brick. Such beautiful color tones and textures in endless variety achieve the utmost in originality, character and distinctiveness.

Here are shown but a few of the many colors and textures available in the complete BELDEN line. Samples and other color combinations will be furnished upon request.

BELDEN dealers are everywhere — they have excellent warehouse and delivery facilities and a reputation for reliable service. The Belden Brick Company has always made it a point to distribute through a selective dealer organization of the highest caliber.
